

D.A.V PUBLIC SCHOOL, NTPC, FARIDABAD

Dear students, parents and teachers
Greetings of the day !

*“Education is a shared commitment between dedicated teachers,
motivated students and Enthusiastic parents with high expectations.”*

Second wave of Covid -19 with its sudden upheavals has changed our routine and lifestyles. We understand the challenges faced by students, parents and teachers to cater to the needs during closure of the school and adapting virtual learning.

Today is the last working day before the summer vacations. Here I wish to share with you all some of my thoughts :

It's summer vacations time for children!

A much needed quality time with family. Mornings with no alarm clocks. One can laze around, eat, play and make merry. Unfortunately, this year too we can't move around to tourist places neither to our relative places but we can use the world in myriad ways. Virtual tours of the places of your choice, good books and of course story tales of parents and grandparents can take us to explore the world. Even, it is the right time to resolve and assimilate what has been gathered into one's being.

You should spend time to develop your hobbies and skills such as letter drafting, improving vocabulary, public speaking, cooking, housekeeping, making presentations using power point, goggle slides, meditation, Yoga and other fitness programs etc. We shall be more than happy if you can share the same with us and your friends during and after the vacations.

Dear parents, I request you all to help your children to develop language skills both reading and writing. Please encourage them to continue to read at least 20 minutes daily may be newspapers, textbooks or any other informative posts on social media. Please help them to be efficient learners on the basis of their past accomplishments.

The school is also encouraging peer learning by organizing class competitions and Webinars during Vacations. Please encourage your wards to participate whole heartedly.

I would also suggest my sincere, hardworking team of teachers to rejuvenate and reinvigorate during the vacations to resume with renewed energy about these goals.

In the end I would add that this is the time not just to deal with current situation but also to build foundations of resilience to face even future challenges. This time can be utilized to envisage opportunities for better learning. **Being hopeful is the key =**

I wish you safe and happy vacations replete with abundant joy, laughter, love with your family.

Spread kindness and be grateful for what you have and make the best out of today.

Stay safe and blessed.

Ms. Alka Arora
