Note :The Evaluation system is devised to develop a regular, systematic and methodical learning among the students, through Experiential learning , Art Integration and Innovative methods. The assessment of each child is based on his/her cumulative record of the on-going assessment which is done on daily basis during teaching-learning process. These checklists and cumulative cards have been designed by DAV Centre For Academic Excellence . The basic objective of on-going evaluation is to compare the past performance of a child with his present so that a future bearing programme can be designed accordingly. Keeping this in mind, these Checklists and Cumulative Cards have been designed term wise.
